

Slope diagnostic: can a 2AFC PF distinguish CI variants?
(matched $p_c=0.7$, $\lambda=0.02$, $n_{\text{Simul}}=5000$)

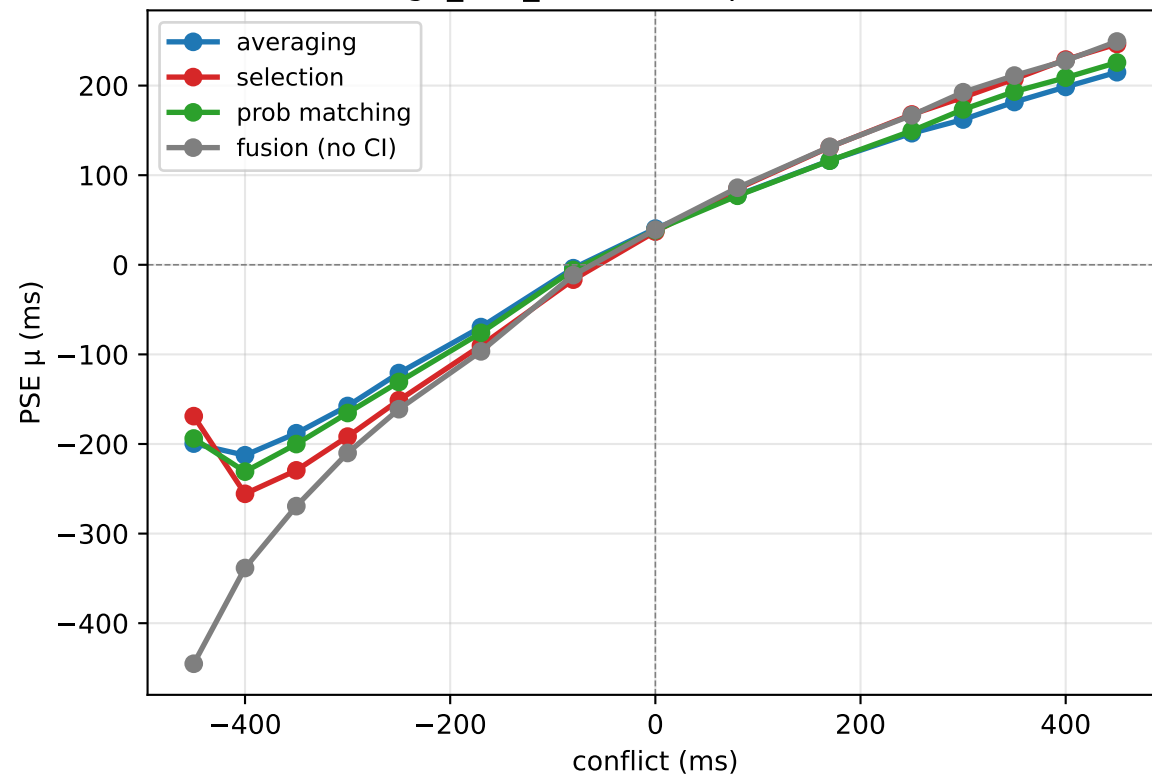

low_aud_noise: PSE (μ) vs conflict

low_aud_noise: PF σ vs conflict (lower σ = steeper PF)

high_aud_noise: PSE (μ) vs conflict

high_aud_noise: PF σ vs conflict (lower σ = steeper PF)
